1. Install MTPredictor v6.5 setup.exe

2. Replace file MTPredictor6.exe from Crack folder into folder c:/Program Files/MTPredictor/

Enjoy.

Now you can use mtpredictor with ascii data feed or with esignal data feed. Or, you can use software - RTDataServer 1.04a (eSignal, MT4, NT 7, NT 6.5, TS8) for use MTP with other data feeds. This software allow use eSignal, MetaTrader 4, NinjaTrader 7, NinjaTrader 6.5, TradeStation 8 as data feed for your MTP. And, quotes will automaticly updating in your MTP !!!

As example you can watch my video: /RTDataServer 1.04a (eSignal, MT4, NT 7, NT 6.5, TS8)/rtdataserver_mt4_video_demonstration.rar for see how it working with metatrader 4.

Folder /Data feed for MetaTrader/ allow you use metatrader 4 as data feed for MTP but quotes in MTP is not will automaticlu updating because MUCH better use MT4 or any other data feed with rtdataserver.

P.S. Why rtdataserver support esignal if MTP working with esignal without rtdataserver? - answer easy: default you can use MTP with esignal data feed if your subscribtion of esignal allow you using other softwares with esignal. IF your type of subscribtion of esignal is not allow use other softwares, you can simple use your esignal with RTdataserver !!!
